

**SC5/4.1a** Describe the movement of the Earth, and other planets, relative to the sun in the solar system.

Open with an animation, introducing the solar system. Sun will be centered with planets moving around it (attached), to create a solar system visual aid. Will zoom in on each planet and describe movement, relative to sun.

'Click on each planet to find out more about it before moving on to build your own (the animation will be relative to movement).

Start building sketch book (ART) with notes
